

DevOps Engineer

Mind4Energy is a young and dynamic company, providing a fully integrated monitoring tool for renewable energy projects. We are currently monitoring over 200 renewable energy installations in Europe and Asia. In order to further develop our monitoring solutions we are currently looking for a DevOps developer.

Job description

You are responsible for the proper functioning of the Mind4Energy monitoring software platform

- You check the correctness of the data of the platform
- You detect abnormal situations and react adequately
- You analyse the issue and formulate a possible solution
- You are responsible for the configuration and maintenance of the office software infrastructure (MSOffice, Dropbox...)

Skills

- You have a hands-on and operational mindset
- You have a strong interest in software and databases
- You have a solution-focused mindset
- You are a quick learner and able to work independently
- You are result oriented, pro-active and always looking for improvements
- You have a Bachelors' degree, or equal by experience

Our offer

An exciting, varied and challenging job within a dynamic team with the opportunity to grow together with us in the fast growing renewable energy market.
